Hey guys those are the features we want to implement this week:
1: Users said that putting post codes in is tedious so add support for google maps (edited)
2: They also feel their landing pages are not personalised enough so lets make them a dashboard (edited)
3: Drivers want to be able to trust the user descriptions more so we need to force users to send pictures of their rubbish3: (edited)
GO GO GO GO guys

 **dtm**
renamed the channel from "iteration2" to "iteration3"

 **amin**
google maps is working mostly. It's on my branch. I will merge to master and deploy tonight (edited)

 **paulbenn**
Tom and me just got the dashboard done too
need to figure out the DOM ids to get them styled properly

 **dtm**
ok I have been locking down the routes but i kinda broke routing will look into it should take 5 mins to fix though will merge then
Also new features guys:
Someone told me they wanted to see their history and to be able to rate drivers

 **dtm**

Someone told me they wanted to see their history and to be able to rate drivers

 **saurav_mitra**
Okay, got a working version of history pushed
Doesn't look that great though

 **dtm**
Ok i have redone the routes they work fine now and just finished the rating system aswell
Amin any progress on the images attached to requests????

 **amin**
Not finished yet. But I'll be finished by tomorrow before the presentation
I think

#iteration2

This is the very beginning of the #iteration2 channel, which you created today.

[Set a purpose](#) [+ Add an app or custom integration](#) [Invite others to this channel](#)

Today

GO GO GO GO guys

- **Agile Development** - At the beginning of each iteration we create a list of tasks for that week.
- **Tech-debt** - A channel dedicated to all the tiny problems we need to fix.

2 Other Tools Used

Github, Gitlab, TeamCity, Travis, Facebook Messenger
